Explanation

This series of benches is made of galvanized steel, a material widely popular for its corrosion resistance and durability. Galvanized steel not only provides the structural strength needed for the bench, but also gives the product a modern and simple appearance. In addition, the design of the bench takes into account the needs for outdoor use, thus it performs well in terms of durability. This picture shows the actual appearance of the U series bench, its length and color can be customized.

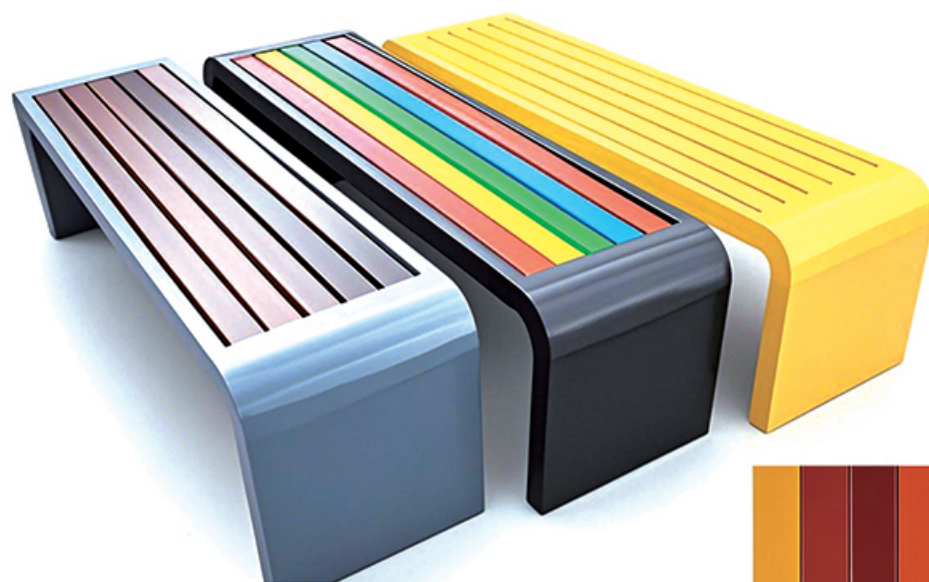

U-Bench

Material:

Galvanized steel/Stainless steel

U-Bench

Material:
Galvanized steel/Stainless
steel+Plastic wood

Product structure

This bench frame is made of galvanized steel, which has excellent rust and corrosion resistance, is sturdy and durable, and can adapt to various outdoor environments. The stool surface uses plastic wood material, combining the advantages of plastic and wood, providing both the texture of wood and the durability and stability of plastic.

Product Advantages Durability

The galvanized steel frame effectively resists oxidation and rust, extending the life of the bench. The plastic wood surface is not prone to cracking, deformation, or fading, and has excellent aging resistance.

Environmentally friendly and energy-efficient: The plastic wood material is recyclable, with low energy consumption in the production process, reducing dependence on natural wood and aligning with environmental protection principles.

Flexible customization: The size of the bench can be customized according to actual needs, meeting different space requirements; the plastic wood has rich and diverse colors, allowing you to choose according to preference or environment style.

applicable scenarios

Suitable for outdoor leisure places such as parks, squares, community gardens, and commercial pedestrian streets, providing people with a comfortable resting space.

Explanation

This outdoor bench is made of galvanized steel with heat transfer imitation wood grain craftsmanship. The galvanized steel material gives the bench excellent sturdiness and durability, with outstanding rust and corrosion resistance. It can withstand various outdoor weather conditions, whether it's scorching sun, heavy rain, or moisture, and maintain its good condition for a long time.

Heat transfer imitation wood grain technology cleverly presents a realistic and natural wood grain effect on the metal surface, combining the aesthetic beauty of wood with the practical advantages of metal. Its delicate texture and soft color add a natural and warm atmosphere to the outdoor space while avoiding the issues of cracking, deformation, and insect damage that are common with solid wood.

The simple and smooth shape of the bench not only adheres to human engineering principles, providing a comfortable seating experience, but also perfectly blends with various outdoor environments such as parks, community walkways, and commercial squares. It is an outdoor facility that combines practical value with aesthetic value.

U-Bench-Backrest

Material:
Galvanized
steel/Stainless steel

Explanation

This bench, after undergoing specialized treatment, exhibits superior anti-rust and anti-corrosion properties. Even when subjected to prolonged exposure to variable outdoor climate conditions, such as intense sunlight, rain erosion, or humid environments, it maintains its structural integrity and durability, retaining its appearance for an extended period. Its surface displays a distinctive metallic luster, which not only imparts a modern aesthetic to the bench but also conveys a sense of stability and grandeur.

Outdoor table and chair set

Explanation

Outstanding Materials, Quality Assurance

The frame is made of galvanized steel, which has undergone special treatment and possesses excellent anti-rust performance, ensuring long-term durability in the ever-changing outdoor environment. The tabletop and seat surface are made of high-quality PS wood-plastic composite, which not only has the natural texture of wood but also features anti-corrosion and waterproof properties. Whether exposed to intense sunlight or rain and wind, it can handle them with ease and remain as good as new for a long time.

Customize at Will, Exclusive Experience

Both color and size can be customized according to your needs. You can choose your favorite color based on the overall style of your outdoor space to create a unique visual effect. You can also customize the size according to the size of your venue to ensure that the table and chairs perfectly blend into your outdoor space, achieving a balance of functionality and aesthetics.

Comfortable and Practical, Enjoy the Outdoors

The simple and elegant design conforms to ergonomic principles, providing a comfortable sitting experience. The spacious and flat tabletop is perfect for placing food, drinks, books, or decorative items. Whether it's a garden party, a break on the terrace, or leisure in the courtyard, this set of table and chairs can create a warm and comfortable atmosphere for you, allowing you to fully enjoy the beauty of the outdoors.

Explanation

Multifunctional dressing bench, enjoy a convenient life

Are you troubled by the messy clothes placement in your bathroom? Our dressing bench with hooks on the top is the ideal choice for you!

Sturdy and durable frame

The bench frame is carefully crafted from galvanized steel square tubes. The galvanization process endows the steel with excellent rust and corrosion resistance. Even after long-term use in a humid bathroom environment, it remains as strong as new, providing stable support and ensuring your safety.

Comfortable and practical seat surface

The seat surface is available in two materials: particle board and solid wood. The particle board surface is smooth and flat, easy to clean and maintain, and has good wear resistance; the solid wood seat surface is natural and environmentally friendly, with a warm texture, providing you with a simple and comfortable experience. Both have excellent load-bearing capacity, allowing you to sit with peace of mind.

Thoughtful hook design

The top of the bench is equipped with multiple hooks, allowing you to easily hang clothes, towels, bathrobes, etc. Take them as you need, quickly and conveniently, and your bathroom space will instantly bid farewell to chaos and remain neat and orderly.

Whether it's a busy morning for quick dressing or a leisurely time after a bath to organize your clothes, this dressing bench can perfectly adapt. It is not only a practical piece of furniture but also a little helper to enhance your quality of life

Changing bench

Explanation

The sturdy and durable galvanized steel frame

The bench is made of high-quality galvanized steel for the frame. The galvanizing process endows it with excellent rust-proof and corrosion-resistant properties. No matter if it's exposed to wind, sun or rain, it will remain firm and stable for a long time, providing you with reliable support and accompanying you through the years.

Simple and practical design

The seat is composed of horizontal wooden boards, which not only display a natural and simple texture but also have good breathability. The rectangular frame structure of the legs is simple and elegant, with strong stability. This simple design style can easily blend into various outdoor environments, whether it's a garden, courtyard, park or lakeside, it can become a beautiful sight.

Personalized customization service

We understand that each customer has unique needs and aesthetics. Therefore, the color and size of this bench can be customized according to your requirements. You can choose your favorite color based on the overall style of your outdoor space, such as fresh green, vibrant blue, warm yellow, etc., to create a bench that is exclusively yours. At the same time, you can customize the size according to the size of the venue to ensure that the bench perfectly fits your outdoor space.
